**Footnotes:**

- Reported historical results and the calculation of 2011 targets for NAPLAN 'national minimum standard' improvement measures do not include exempt students.
- Weighted Likelihood Estimates were used to calculate figures for all Mean Scale Scores (including South Australian averages and gains).
- The agreed model for the assessment of gain measures in South Australia uses a 2008-2010 State Gain baseline, hence figures reported here are NAPLAN Mean Scale Score results of non-matched South Australian students in the relevant years, cohorts and domains. These results may differ from other reported State Mean Scale Scores, as Plausible Values are used in reporting at national and jurisdictional level.
- The 2009-2011 Mean Scale Score gain result is calculated for all students achieving scores in the same schooling sector in both years. These results are for matched student cohorts.

**Approved Variations:**

- Inclusion of Year 7 target group for reporting under mandated NAPLAN measures.
- Use of 'Gain in Mean Scale Score' for measuring Indigenous student performance in lieu of "At or Above National Minimum Standard (Indigenous)".
- Inclusion of 'Gain in Mean Scale Score' for measuring all student performance as a local measure.
