

## Schedule

# National Water Grid Fund

## FEDERATION FUNDING AGREEMENT – INFRASTRUCTURE

<b>Table 1: Formalities and operation of schedule</b>	
Parties	<p>Commonwealth</p> <p>New South Wales</p> <p>Victoria</p> <p>Queensland</p> <p>Western Australia</p> <p>South Australia</p> <p>Tasmania</p> <p>Northern Territory</p> <p>Australian Capital Territory</p>
Duration	<p>This Schedule will commence as soon as the Commonwealth and one other Party sign it and will expire on 30 June 2031.</p>
Purpose	<p>This Schedule will support the development and delivery of nationally important water infrastructure projects that provide safe and reliable water for regional and remote communities, generate public benefit through productive water use and build resilience while protecting the environment and cultural heritage.</p> <p>In entering into this Schedule, the Commonwealth and the States and Territories (the States) recognise they have a mutual interest in improving outcomes through national water infrastructure development and need to work together to achieve those outcomes.</p>
Related Documents	<p>This Schedule must also be read in conjunction with the National Water Grid Investment Framework (the Investment Framework), the Program Administration Manual for the National Water Grid Fund, the Indigenous Employment and Supplier-Use Water Infrastructure Framework, and the National Water Grid Authority's Science Strategy.</p>
Estimated financial contributions	<p>Details of the Commonwealth and the States' estimated financial contributions to the operation of this Schedule are set out in the tables below and the relevant appendices to this Schedule.</p> <p>State funding contributions may include contributions from third parties including local governments and other non-government organisations.</p> <p>Commonwealth contributions will be provided upon the achievement of agreed project milestones by the relevant State.</p>

<p>Funding arrangements</p>	<p><i>Capital works</i></p> <p>The Commonwealth may offer a combination of funding and finance of up to 50 per cent of the project's total capital costs for delivery. Where the Commonwealth deems a project to be transformational in nature or where a specific policy need has been identified, the Commonwealth may, at its sole discretion, offer more than 50 per cent funding for an eligible project.</p> <p><i>Development funding</i></p> <p>The Commonwealth will seek a financial co-contribution for all project proposals. However, the Commonwealth may agree to provide up to 100 per cent of funds for elements of business case development and science projects, at its discretion.</p> <p><i>Project cost savings</i></p> <p>Where projects are delivered for less than the agreed estimated costs, States should work with the Commonwealth to agree a reallocation of the remaining Commonwealth contribution to other water infrastructure projects within their jurisdiction, consistent with the principles of the Framework and the objectives of this Schedule.</p>
<p>Project milestones</p>	<p>The States will deliver the water infrastructure projects set out in this Schedule and its Appendices, based on project milestones which have been jointly agreed and which may, by written agreement, be varied by the relevant parties from time to time.</p>
<p>Commonwealth Funding Recognition</p>	<p>In addition to the requirements set out in clause 21 of the Federation Funding Agreement for Infrastructure, States agree to:</p> <ul style="list-style-type: none"> <li>(a) recognise the Commonwealth's funding contribution to projects in all publications, promotional and advertising materials, including project signage, and public announcements and activities in relation to a project as appropriate, and must consult the Commonwealth prior to release of all promotional-related materials concerning projects funded through this Schedule;</li> <li>(b) provide reasonable opportunity for the Commonwealth to contribute to developing communications strategies for projects with a Commonwealth funding contribution;</li> <li>(c) provide the Commonwealth with equal access to products that they obtain for use in the development of promotional material including but not limited to project data, footage and images; and</li> <li>(d) where the Commonwealth is a majority funder of a project, promotional material and public recognition should provide major prominence to the Commonwealth's contribution, with the Parties to agree the content and timing.</li> </ul>
<p>Variations and Delegations</p>	<p>Senior Commonwealth and State Officials are authorised to make non-material changes to project milestones as set out in the Appendices to this Schedule, as agreed in writing by both parties, having due regard to financial and policy risks.</p>

**Table 6A: South Australia – Projects and payment summary**

Outputs (Projects)	Project scope	Total Commonwealth contribution	Total non-Commonwealth contribution
<p><b>New Water Infrastructure to Barossa Detailed Business Case (Completed)</b></p>	<p>The Detailed Business Case will investigate the viability of delivering new water supply to Barossa and Eden Valleys that addresses industry demand from the wine, livestock, and horticulture sectors. New water sources would provide security from declining rainfall, surface water and underground water availability. The proposed project aims to provide secure, climate independent and new water infrastructure, support growth and productivity to the broader region for primary industries, and help meet long term market demand. The Business Case will consider infrastructure options to treat, transfer, and distribute high-quality recycled water that is able to complement other water sources and supplies and to bring long-term water security and certainty to the region.</p>	<p>\$3,500,000</p>	<p>\$1,550,000</p>
<p><b>Eden Valley Raw Water Scheme Preliminary Business Case (Completed)</b></p>	<p>The Preliminary Business Case will include technical investigations to support the proposed construction of approximately 53km of new large capacity water supply pipelines, pump stations and storage that would provide access to 3.2GL per annum of irrigation quality water for Eden Valley. If constructed, the project would aim to provide opportunity for access to a new source of water for approximately 20,000ha.</p>	<p>\$1,000,000</p>	<p>\$130,000</p>
<p><b>Clare Valley Water Supply Preliminary Business Case (Completed)</b></p>	<p>The Preliminary Business Case will include investigations into a proposed 45-50km pipeline and a new pump station to deliver up to 4GL per annum from the Bundaleer reservoir to the Clare Valley region. If constructed, the project would aim to promote growth and increase annual grape yields from an average of 20,000-25,000 tonnes per year to 30,000 tonnes by 2030.</p>	<p>\$800,000</p>	<p>\$0</p>

<p><b>SA Connections Funding Pathway Package</b></p>	<p>Construction of the following projects:</p> <ul style="list-style-type: none"> <li>• Waikerie Irrigated Agricultural Water Access and Security project</li> <li>• Greenway's Irrigation Trust – Increasing Water Availability, Reliability and Efficiency</li> <li>• Recycled Water Pipeline to Nairne – Stage 1</li> <li>• Regional Recharge Farms</li> <li>• Pogona Barbata – Water for High-Tech Horticulture</li> <li>• Barossa Wine Grape Water Source Diversification</li> <li>• Improving Water Deliverability and Accessibility in the Lower Murray Reclaimed Irrigation Area.</li> </ul>	<p>\$14,069,070</p>	<p>\$49,304,900</p>
<p><b>Northern Water Supply Detailed Business Case</b></p>	<p>The Detailed Business Case will investigate a range of sustainable water delivery options with the aim to reduce reliance on finite groundwater sources as well as the River Murray and preserve impacts on ecosystems, fauna and flora and indigenous cultural assets reliant on these natural resources. This project also aims to activate a global copper province and support broader economic development in the region.</p> <p>The Detailed Business Case will develop a financial model that estimates the net financial performance of the preferred option including investment required; undertake technical investigations; manage environmental approvals; develop a stakeholder management plan; develop land access and approval plans; and develop the project's Governance Framework.</p>	<p>\$5,000,000</p>	<p>\$10,000,000</p>
<p><b>McLaren Vale Irrigation Water Security Project</b></p>	<p>The McLaren Vale Irrigation Water Security Project Detailed Business Case seeks to further increase the availability of recycled water for irrigation uses to the McLaren Vale and surrounding areas, which will also enhance the security of water in the region from the impacts of climate change.</p>	<p>\$470,000</p>	<p>\$30,000</p>
<p><b>Iga Warta Water Security Project</b></p>	<p>The Iga Warta Water Security Project aims to improve water quality and overall availability throughout the Iga Warta Homeland. The project will be delivered in two stages:  Stage 1: Planning and bore drilling program  Stage 2: Rehabilitation of existing bore</p>	<p>\$190,000</p>	<p>\$150,000</p>

**Table 6B: South Australia – Projects and payment summary – Science Projects**

Outputs (Projects)	Project scope	Total Commonwealth contribution	Total non-Commonwealth contribution
<p><b>Further sustainable expansion of irrigated agriculture along the Northern Adelaide Corridor</b></p>	<p>Research trial over 3 years to address challenges of increasing agricultural expansion north of Adelaide (Mallala to Balaklava). Water volumes and quality will be identified and modelling done to assess its use for growing crops in the region.</p>	<p>\$1,120,000</p>	<p>\$480,000</p>
<p><b>Optimising the agricultural uses of varying water qualities in the Barossa Region</b></p>	<p>This 2 year project will address the challenge of matching water demand with volume and quality. A research report will be produced with advice on infrastructure required to store water (when it is not required) and blend (when the quality is not fit for purpose). Groundwater volumes and water quality within this region identified through the SA DEW groundwater assessment will inform agronomic modelling to assess the sustainability of groundwater use for growing a range of crops on the region's soil types.</p>	<p>\$280,000</p>	<p>\$120,000</p>
<p><b>Adaptation of the South-Eastern Drainage System under a changing climate</b></p>	<p>Research Report. This project focusses on adaptation of the drainage system (in the Limestone Coast Landscape Region) and the potential to retain and redirect water in the landscape to mitigate risks and build resilience to the benefit of multiple primary industries and the environment. There are five subprojects/tasks:</p> <ul style="list-style-type: none"> <li>• Task 1: Quantifying the value of different water uses and future demands</li> <li>• Task 2: Current and future water availability</li> <li>• Task 3: Groundwater and wetland modelling</li> <li>• Task 4: Seawater intrusion risk</li> <li>• Task 5: Landscape feasibility analysis</li> </ul>	<p>\$1,500,000</p>	<p>\$500,000</p>
<p><b>Self-Supplied Remote Communities Groundwater Quality Assessment</b></p>	<p>The project will capture information regarding the availability, longevity and quality of groundwater in the vicinity of self-supplied remote communities identified as being at high risk of water insecurity in the coming 10 years.</p>	<p>\$250,000</p>	<p>\$50,000</p>

<p><b>APY Lands Groundwater Quantity and Quality Investigation</b></p>	<p>This project investigates possible future use of additional aquifers identified previously in the Anangu Pitjantjatjara Yankunytjatjara (APY) Lands, which could potentially be developed to support community and agricultural initiatives. The project includes work to identify and characterise new water sources and community engagement to understand priorities for using water.</p>	<p>\$1,900,000</p>	<p>\$600,000</p>

<b>Table E3: South Australia - Performance requirements, reporting and payment summary</b>			
<b>Output (Project)</b>	<b>Performance milestones</b>	<b>Milestone due</b>	<b>Payment</b>
<b>New Water Infrastructure to the Barossa Detailed Business Case</b>	Milestone 1 – Acceptance of Project Plan including key deliverables and timelines for the delivery of the Detailed Business Case.	30 September 2021	\$1,000,000
	Milestone 2 – Completion of draft Preliminary Summary Report of options analysis and detailed demand profile.	31 January 2022	\$2,000,000
	Milestone 3 – Acceptance by the Australian Government of the Detailed Business Case.	31 May 2022	\$500,000
<b>Eden Valley Raw Water Scheme Preliminary Business Case</b>	Milestone 1 – Acceptance of Project Plan including key deliverables and timelines for the delivery of the Preliminary Business Case.	31 December 2021	\$250,000
	Milestone 2 – Completion of draft Preliminary Business Case.	31 January 2022	\$500,000
	Milestone 3 – Acceptance by the Australian Government of the final Preliminary Business Case.	31 March 2022	\$250,000
<b>Clare Valley Water Supply Preliminary Business Case</b>	Milestone 1 – Acceptance of Project Plan including key deliverables and timelines for the delivery of the Preliminary Business Case.	31 December 2021	\$200,000
	Milestone 2 – Completion of draft Preliminary Business Case	31 May 2022	\$400,000
	Milestone 3 – Acceptance by the Australian Government of the final Preliminary Business Case.	31 July 2022	\$200,000
<b>Connections Funding Pathway</b>	<p>Milestone 1 – Written confirmation of the details of the SA Connections Package, including:</p> <ul style="list-style-type: none"> <li>• Projects to be delivered</li> <li>• Expected costs of each project and confirmation of funding partner contributions</li> <li>• Construction timing for each project.</li> </ul>	31 October 2021	\$5,000,000

	<p>Milestone 2 – Submission and acceptance of a Progress Report detailing the status of delivery of the SA Connections Package, including:</p> <ul style="list-style-type: none"> <li>• Current status of each project</li> <li>• Advice on any changes to construction timing</li> <li>• Advice on cost amendments (if any) for each project, including amendments to funding partner contributions</li> <li>• Challenges or issues in delivery of the package.</li> </ul>	30 May 2023	\$4,069,070
	<p>Milestone 3 – Submission and acceptance of a Post Completion Report, including confirmation that all projects have been completed and advice on final costs of each project in the package.</p>	30 April 2024	\$5,000,000
<b>Northern Water Supply Detailed Business Case</b>	<p>Milestone 1 – Acceptance of Project Plan including key deliverables and timelines for the delivery of the Detailed Business Case.</p>	31 March 2022	\$1,500,000
	<p>Milestone 2 – Completion of draft Detailed Business Case.</p>	30 April 2023	\$3,000,000
	<p>Milestone 3 – Acceptance by the Australian Government of the final Detailed Business Case.</p>	31 July 2023	\$500,000
<b>McLaren Vale Irrigation Water Security Project</b>	<p>Milestone 1 – Acceptance of Project Plan including key deliverables and timelines for the delivery of the Detailed Business Case.</p>	31 May 2022	\$120,000
	<p>Milestone 2 – Completion of draft Detailed Business Case.</p>	30 November 2022	\$300,000
	<p>Milestone 3 – Acceptance by the Australian Government of the final Detailed Business Case.</p>	31 March 2023	\$50,000
<b>Iga Warta Water Security Project</b>	<p>Milestone 1 – Acceptance of Project Management Plan, including key deliverables and timelines; and Indigenous Participation Plan.</p>	31 March 2024	\$100,000
	<p>Milestone 2 – Acceptance of Project Completion Report, including confirmation that both stages have been completed.</p>	31 August 2024	\$90,000

<b>Table E4: South Australia - Performance requirements, reporting and payment summary – Science Projects</b>			
<b>Output (Project)</b>	<b>Performance milestones</b>	<b>Milestone due</b>	<b>Payment</b>
<b>Further sustainable expansion of irrigated agriculture along the Northern Adelaide Corridor</b>	Milestone 1 – Delivery and acceptance of a Project Plan outlining the project.	31 March 2022	\$350,000
	Milestone 2 - Delivery and acceptance of a report including information on groundwater volume and quality assessed.	15 January 2024	\$280,000
	Milestone 3 – Delivery and acceptance of a report, including information on: <ul style="list-style-type: none"> <li>• Agronomic modelling domain developed and optimised</li> <li>• Irrigation expansion on the receiving environment assessed</li> <li>• Longevity of water utilisation and mitigation strategies under current and future climate assessed.</li> </ul>	15 May 2024	\$280,000
	Milestone 4 – Delivery and acceptance of a final report, including information on: <ul style="list-style-type: none"> <li>• Field component completed</li> <li>• Off farm desalination and low-cost energy options assessed and recommendations</li> <li>• Storage, brine disposal and infrastructure considerations developed.</li> </ul>	15 May 2025	\$210,000
<b>Optimising the agricultural uses of varying water qualities in the Barossa Region</b>	Milestone 1 – Delivery and acceptance of a Project Plan outlining the project.	31 March 2022	\$70,000
	Milestone 2 – Delivery and acceptance of the Interim Report, including information on: <ul style="list-style-type: none"> <li>• Assessment of all water volumes, quality and current crop demand</li> <li>• Modelled data showing water volume and quality demand required by crops based on soil types in the Barossa and Eden Valley.</li> </ul>	15 January 2024	\$140,000
	Milestone 3 – Delivery and acceptance of the Final Report, including information as above plus economic analysis of options and infrastructure requirements.	15 May 2024	\$70,000
<b>Adaptation of the South-Eastern Drainage System under a changing climate</b>	Milestone 1 – Acceptance of the confirmed partnership and project management arrangements.	31 March 2022	\$300,000
	Milestone 2 – Delivery and acceptance of a progress report on Task 4 – Seawater Intrusion Risk.	31 March 2023	\$320,000

	Milestone 3 – Delivery and acceptance of an interim report, including progress information for all Tasks 1 to 5, as listed in Table 6B of this Schedule.	15 January 2024	\$510,000
	Milestone 4 – Delivery and acceptance of an interim report, including progress information for Task 2, Task 3 and Task 4 as listed in Table 6B of this Schedule.	15 January 2025	\$290,000
	Milestone 5 – Delivery and acceptance of a final report for Tasks 1 to 5, as listed in Table 6B of this Schedule.	15 May 2025	\$80,000
<b>Self-Supplied Remote Communities Groundwater Quality Assessment</b>	Milestone 1 – Delivery and acceptance of a Project Plan outlining the project.	30 September 2023	\$200,000
	Milestone 2 – Delivery and acceptance of a progress report, including information summarising community's sampled and indicative results.	30 April 2024	\$25,000
	Milestone 3 – Delivery and acceptance of the Final Report, including information as above plus methodology, data, findings and recommendation for future work.	31 May 2024	\$25,000
<b>APY Lands Groundwater Quantity and Quality Investigation</b>	Milestone 1 – Delivery and acceptance of a Project Plan outlining the project.	31 May 2024	\$330,000
	Milestone 2 – Delivery and acceptance of a progress report, including information on community consultation and workshops.	31 October 2024	\$230,000
	Milestone 3 – Delivery and acceptance of a progress report, including information on desktop review of existing knowledge and consolidation of cultural mapping.	31 January 2025	\$500,000
	Milestone 4 – Delivery and acceptance of a progress report, including information on the scope of works for groundwater resource assessment (1) near surface hydrogeophysical investigations (2) drilling program and (3) aquifer testing and water quality sampling and analysis.	31 October 2025	\$520,000
	Milestone 5 – Delivery and acceptance of a progress report, including information on water use scenarios, developed in conjunction with the communities.	28 February 2026	\$200,000
	Milestone 6 – Delivery and acceptance of a Final Report.	30 April 2026	\$120,000
