Table 2. Requirements of NHHA Clause 37(a)(i)

2023–24 Expenditure (\$M)	Australian Government	State Government	TOTAL
Women and children affected by family and domestic violence	20.3	47.4	67.7

The approach to disaggregation is identical to the methodology applied in previous years. Client proportions from the Australian Institute of Health and Welfare Specialist Homelessness Services (SHS) Collection annual report 2023–24 were applied to the total expenditure for SHS.

Expenditure from non-SHS homelessness responses is wholly allocated to the most relevant priority cohort. Note overlap exists between cohorts and some initiatives are not cohort specific.

Queensland has elected to supply reporting for 2023–24 in the same format used in previous years to ensure consistency and comparability with past reports under the NHHA, while also reducing administrative burden. The Crisafulli Government is committed to working collaboratively with the Australian Government, and I note Queensland officials are actively engaging with their Commonwealth counterparts to streamline future reporting arrangements under the NASHH.

Reporting on the reforms and initiatives in Queensland's bilateral schedule, as required under clause 40, are enclosed. If you require further information, [REDACTED]

Yours sincerely
