Capital investments will specifically support HPAI detection, diagnosis, response, and prevention of spread. Guidance to States and Territories (the States) on the types of equipment that are eligible for purchase by States is contained in Appendix A to this Schedule.</p> <p>States will contribute to this purpose through a range of support such as staffing, training, asset management, ongoing maintenance and/or other investments in capital and consumable items. These co-contributions will be specified in the project plan submitted by States.</p>

The provision of Commonwealth financial contributions is contingent on States providing appropriate co-investment that is consistent with the Purpose of this Schedule.2. States will work expeditiously to prepare for an incursion of high pathogenicity avian influenza (HPAI) through development of State response plans. The specialist equipment purchased with the Commonwealth financial contributions under this Schedule will be suitable for surveillance and/or response for outbreaks in the production sector and/or in Australian wildlife as outlined in response plans.3. To the greatest extent possible, States will support national coordination to further the objective of boosting national response capability for the threat of HPAI.

Proposed in-scope funding categories with examples	Proposed out-of-scope funding categories with examples (may form co-contribution from states and territories)
<p>Response equipment – for example, biosecurity trailers or vans that can be strategically deployed across jurisdictions to reduce response times in wildlife or agriculture. Cleaning equipment to prevent horizontal spread of infection (e.g. wheel-wash or truck wash equipment).</p>	<p>Consumables – for example, PPE, carbon dioxide (or other gases), chemical products, pit liners.</p>
<p>Diagnostic equipment – mobile diagnostic trailers or vans, capital equipment to increase testing and diagnostic capacity.</p>	<p>Laboratory supplies – reagents, containers, bags</p>
<p>Depopulation equipment – higher welfare depopulation equipment for both large and small scale operations depending on local industry. Including MAK units, vessels for CO₂ gassing, and foaming units (preference for the higher welfare outcomes associated with nitrogen-based foam units).</p>	<p>Staffing and consultants – personnel for HPAI preparedness or response planning</p>
<p>Disposal equipment – capital equipment to improve biosecure disposal of carcasses</p>	<p>Training – material or resources to train staff</p>
